Indices of Deprivation

The Indices of Deprivation 2004 were published by the Department for Communities & Local Government (DCLG) in May 2004, and revised in June 2004. They measure deprivation at a small area level of Lower Layer Super Output Areas (SOAs). SOAs are a new geography designed for the collection and publication of small area statistics and fit within current Ryedale ward boundaries. The ID 2004 updates the ID 2000 in two key ways, more up-to-date data has been used and new measures have been incorporated as new and improved data sources have become available, therefore ID 2000 and ID 2004 are not comparable.

Index of Multiple Deprivation

The IMD 2004 provides an overall score of deprivation, combining 7 distinct categories of deprivation, known as domains. These domains cover:

| | | | |
|-------------------------------------|--------------|-------------|-------------------------|
| Low income | Lack of work | Poor health | Lack of education |
| Poor housing and access to services | Crime | | Poor living environment |

There are also two supplementary indices:

Child poverty

Older people in poverty

The Indices are available on the DCLG website www.communities.gov.uk by following the links to Research and Statistics/Publications/Creating better communities research and statistics/Indices of Deprivation. Maps of SOAs are available on the Office for National Statistics website www.statistics.gov.uk under Neighbourhood.
