

Local Authority ECO Flexible Eligibility - Statement of Intent

- 1) Ryedale District Council, Hambleton District Council, Richmondshire District Council, Scarborough Borough Council (“the Councils”)
- 2) Date of publication 12 June 2019
- 3) Version number 2
- 4) Publication on website: 12 June 2019

1) Introduction

This joint Statement of Intent (SOI) sets out how “the Councils” will work closely with energy companies, managing agents, installers and customers to maximise the potential of the ECO Flexible Eligibility funding stream for fuel poor households.

Through ECO Flexible Eligibility, local authorities can set their own qualifying criteria to enable eligible homeowners and private renting tenants to benefit from funding for domestic energy efficiency measures. This funding is aimed at residents that are most likely to be in fuel poverty. Energy companies can allocate up to 25% of their full obligation to measures qualified via ECO Flexible Eligibility.

Our approach to ECO Flexible Eligibility is based on the following principles:

- Eligibility criteria is simple and streamlined
- Eligibility criteria is to be in line with other criteria used on current energy efficiency programmes being delivered by the Councils
- Engagement with energy suppliers, local members and partners is essential
- Funding opportunity to be promoted throughout the districts

Please note that meeting the Councils ECO Flexible Eligibility criteria does not guarantee the installation of measures. The final decision will depend upon:

- The survey carried out by accredited contractor and the calculated installation costs
- The energy bill savings that can be achieved for the property
- Whether energy suppliers have achieved their ECO targets or require further measures to meet their ECO targets

ECO Flexible Eligibility fits with the Councils’ commitment to reduce carbon emissions and alleviate fuel poverty, specifically:

- The York, North Yorkshire and East Riding of Yorkshire Housing Strategy 2015-21, which has nine priorities to meet the housing challenges within North Yorkshire. Specifically priority seven, as well as the Councils’ own strategic aims to reduce carbon emissions, tackling fuel poverty and delivering efficient and secure energy.

2) How the Councils intend to identify eligible households

Households will be considered at risk of fuel poverty if they are determined to be a low income household and living in a high cost home in relation to energy use (Low Income / High Cost - LIHC) or have a pre-existing condition making them vulnerable to the effects of living in a cold home (Low Income / Vulnerable to Cold - LIVC).

Households need to meet Stage 1 (Low Income) criteria and one of the Stage 2 (High Cost / Vulnerable to Cold) criteria – these are based on the March 2015 Government Fuel Poverty Strategy and the NICE guidance NG6 on “Excess winter deaths and illness and the health risks associated with cold homes.”

Stage	Eligibility Criteria
1) Low Income	Annual household income (after rent or mortgage) of £21,000 or less
<i>And</i>	
2a) High Cost	Property EPC rating of E, F or G
2b) High Cost	Property EPC rating of D and living in a hard to treat home: <ul style="list-style-type: none"> - Property has solid walls, non-standard cavity walls or system built walls, or, - Property is off the gas network
2c) Vulnerable to Cold	Property EPC rating of D; and a health condition made worse by cold: <ul style="list-style-type: none"> - Chronic respiratory condition, or - Cardiovascular condition, or - Musculoskeletal illness, or - Mental health condition
2d) Vulnerable to Cold	Property EPC rating of D; and vulnerable due to age or circumstance: <ul style="list-style-type: none"> - over 70 years of age, or - a pregnant women, or - have dependent children under 5 years of age

Private renting sector restrictions

There are EPC restrictions in place for the private renting sector which prevent access to ECO Flexible Eligibility for certain measures. This has been enforced to stop private landlords using ECO funding to meet their requirements under MEES legislation.

As of October 2018, private renting tenants can only qualify for ECO funded measures if the property they rent has an EPC in band E or above (other than Solid Wall Insulation and Renewable Heating where EPCs can also be in band F or G).

Private renting tenants are also prevented from accessing funding for heating system upgrades or repairs (i.e. boiler replacements) but can qualify for funding for first time central heating, providing the EPC criteria is met.

The EPC restriction is only in place for private rented accommodation and must be considered in conjunction with the eligibility criteria set out in this Statement of Intent.

Requirements for SWI "in-fill" installations

Residents that don't meet the criteria in this Statement of Intent could still benefit from ECO funding for Solid Wall Insulation through the "in-fill" mechanism.

Where a household doesn't meet the criteria, they can be declared "in-fill" if they are:

- A) in an immediately adjacent building to; or
- B) are in the same building as a household that does meet the criteria in this Statement of Intent; or
- C) in the same terrace as, or
- D) back to back entire terraces, but only if the back of the actual properties are touching (not back to back garden / alleyway separates the terrace)

There is also a minimum percentage of households that can apply:

Property Type	LA declaration requirements
Project consisting of a pair of semi-detached houses or bungalows, or a building containing no more than two domestic premises.	At least one of the two properties must meet the eligibility criteria in this Sol (i.e. 50% of the properties are LIHC or LIVC).
Project consisting of any premises that are contained in the same building (e.g. flats), immediately adjacent buildings (e.g. neighbouring properties) or in the same terrace.	All properties that are receiving a LA Flex measure must be covered by a declaration. This applies to LIHC, LIVC and infill properties. Up to 50% of total LIHC or LIVC combined properties within the project can receive a measure.

4) Governance

The Councils will work with project partners to identify households that meet the ECO Flexible Eligibility criteria. Partners will engage with residents and collect the required evidence to demonstrate eligibility. They will also liaise with ECO obligated Energy Companies and prepare the declaration forms for the Councils to sign.

The Officers responsible for signing valid “Local Authority Declarations” as determined through delegated authority are as follows:

Ryedale District Council:	Senior Specialist (People)
Hambleton District Council:	Residential Team Leader
Richmondshire District Council:	Improvement and Adaptions Advisor
Scarborough Borough Council:	HIA Manager

5) Referrals

The Councils will receive referrals for ECO Flexibly Eligibility in the following ways:

1. Self-referrals from residents
2. From other Council teams or partner organisations
3. Warm & Well in North Yorkshire
4. Referrals from accredited managing agents or installers
5. From front line staff within the health and social care sectors and trusted partner agencies

5) Evidence, monitoring and reporting

The data collected from residents will be sufficient to confirm their eligibility. This will include:

- Name, address and telephone number
- Proof of income
- EPC or alternative agreed assessment

Evidencing Vulnerability:

- Over 70 years of age (birth certificate, passport or driving licence)
- Pregnant women (Mat B1 letter)
- Child under 5 years of age (birth certificate)
- Health condition exacerbated by cold (letter from GP, letter from hospital, invitation for free flu jab for health reasons, referral from a medical professional)

Each applicant will be asked how they were made aware of the scheme, which will enable us to monitor the different targeting pathways/promotional methods.

Records will be kept of all households targeted, referred and who receive a measure.

To reduce the risk of fraud, checks will be made on eligibility.

Auditing of claimants will be assessed by a random sample of households on a post installation basis.

Quarterly project meetings will be held with the project partners to monitor progress.

7) Signatures

Ryedale District Council

Name: Tony Galloway
Position: Deputy Chief Executive

Hambleton District Council

Name: Paul Staines
Position: Director - Environment

Richmondshire District Council

Name: Colin Dales
Position: Corporate Director (Operations)

Scarborough Borough Council

Name: Rebecca Jackson
Position: Solicitor Legal Service Manager
