1. LICENCE DISPLAY

1.1. The licence, or a copy of the licence, should be suitably displayed to the public in a prominent position.

2. ACCOMMODATION

2.1. Animals must at all times be kept in accommodation and environment suitable to their species with respect to situation, size, temperature, lighting, ventilation and cleanliness and not exposed to draughts. All accommodation must be kept in good repair.

2.2. If animals are displayed outdoors, they should have protection appropriate to their species.

2.3. Housing must be constructed of non-porous materials or be appropriately treated.

2.4. In order to control the spread of disease, and to prevent injury, animals must not be kept in housing in such a way that they can be disturbed by other animals or by the public.

2.5. All livestock, for sale, must be readily accessible and easy to inspect, with cages sited so that the floor of the cage is readily visible.

2.6. Accommodation must be cleaned as often as necessary to maintain good hygiene standards.

2.7. Where accommodation is on a tiered system, water food or other droppings must not be allowed to enter the lower housing.

2.8. All accessories provided in the accommodation must be suitable for the species.

3. EXERCISE FACILITIES

3.1. Suitable and sufficient facilities must be available where appropriate.  
N.B. For puppies, where required, a covered exercise area of at least 2.46 sq. metres (26 sq. ft.) should be provided. Exercise areas should have a minimum height of 1.8 metres (6 ft.) to facilitate adequate access by staff for cleaning.
4. REGISTER OF ANIMALS

4.1. A livestock register must be maintained for all livestock. A sales register must be maintained for:

(a) puppies;
(b) kittens;
(c) psittacines;
(d) species contained in the Schedule to the Dangerous Wild Animals 1976 (as modified).

N.B. This can be by cross reference to an invoice file. The purpose of the register is to ascertain the source of livestock and or emergency contact of purchaser. The name and telephone number of the purchaser should be obtained.

5. STOCKING NUMBERS AND DENSITIES

5.1. The maximum numbers of animals to be stocked on the premises will be governed by the accommodation available, as stated in the stocking density lists detailed in the schedules to these licence conditions. No other animals, other than those specified in the licence, may be stocked without prior written approval from the licensing authority.

(a) Schedule 1 – Caged Birds;
(b) Schedule 2 – Small Mammals;
(c) Schedule 3 – Ornamental Fish;
(d) Schedule 4 – Other Species.

6. HEALTH, DISEASE AND ACCLIMATISATION

6.1. All stock for sale must be in good health and free from obvious parasitic infestation as far as can be reasonably determined without a veterinary inspection.

6.2. Any sick or injured animal must receive appropriate care and treatment without delay. Inexperienced staff must not treat sick animals unless under appropriately experienced supervision.

NB ‘care and treatment’ may include euthanasia but under no circumstances may an animal be euthanased other than in a humane and effective manner. In case of doubt, veterinary advice must be sought.

6.3. All animals must receive appropriate inoculations where required for the species, as advised by the Veterinary Surgeon. Veterinary advice should be sought where necessary.

6.4. Any animals with an obvious, significant abnormality which would materially affect its quality of life, must not be offered for sale. When in doubt, veterinary advice should be sought.

6.5. All animals must be allowed a suitable acclimatisation period before sale.

6.6. Facilities must be provided to isolate sick animals.

NB For ornamental fish, in-line UV treatment or other sterilising devices effectively provide a means of isolating individual tanks in multiple tank systems. They must be of a proper size, and maintained in accordance with manufacturers’ recommendations.

6.7. All reasonable precautions must be taken to prevent the outbreak and spread of disease. No animals which is suffering from or could reasonably be suspected of having come into contact with any other animal suffering from, any infectious or contagious disease, or which is infested with parasites, shall be brought into or kept on the premises unless effectively isolated.

6.8. Puppies and kittens must be kept separate from other litters.
6.9. All necessary precautions must be taken to prevent the introduction to the premises, and
harbourage, or rodents, insects and other pests.

**NB 'Rodent' and 'insect' excludes livestock for sale or for feeding.**

7. **FOOD AND DRINK**

7.1. Animals must be supplied with adequate amounts of food and drink, appropriate to their needs,
and at suitable intervals.

7.2. All food must be suitable for the species concerned.

7.3. Food and drink receptacles must be constructed and positioned to minimise faecal
contamination and spillage.

7.4. A suitable and sufficient number of receptacles must be provided and cleaned at regular
intervals.

8. **FOOD STORAGE**

8.1. All food, excluding live foods, intended for feeding to livestock on the premises, must be stored
in impervious closed containers.

8.2. The containers and equipment used for feeding must be kept in a clean and sound condition.

9. **OBSERVATION**

9.1. All livestock must be attended to at regular intervals, at least once daily, appropriate to the
species. It is recommended that a system of recording observation is maintained.

10. **EXCRETA AND SOILED BEDDING**

10.1. All excreta and soiled bedding must be kept in a hygienic manner and stored in impervious
containers with close fitting lids – away from direct sunlight.

10.2. Excreta and soiled bedding should be removed from the premises on a regular basis, at least
weekly, and disposed of to the satisfaction of the local authority and in accordance with current
regulations and good waste management practice.

10.3. All containers must be kept in a clean condition.

11. **TRANSPORTATION**

11.1. When receiving stock, the license must make every effort to ensure that it is transported in a
suitable manner. It is advisable (recommended) to record the registration number of vehicles
transporting livestock.

11.2. Any livestock received or consigned shall be transported according to the regulations laid down
in current legislation; such as the Welfare of Animals (Transport) Order 1977.

**NB For air transportation, the IATA guidelines must be followed as a minimum legal
standard.**

12. **TRANSPORTATION CONTAINERS**

12.1. Livestock must be transported or handed to purchasers in suitable containers.
13. **SALE OF LIVESTOCK**

13.1. No mammal shall be sold unweaned or, if weaned, at an age at which it should not have been weaned.

13.2. In the case of non-mammals, they must be capable of feeding themselves.

14. **DANGEROUS WILD ANIMALS**

14.1. When dangerous animals are kept, the cages must be of a secure construction appropriate to the species. A fine wire mesh, glass or plastic safety barrier must be incorporated into the cage system.

14.2. The local authority should be notified in the event that the pest shop wishes to offer for sale, for the first time, any animal in the Schedule of the Dangerous Wild Animals Act. Although it is acknowledged that there is an exemption contained within the Act in relation to pet shops, it is recommended that consideration should be given to complying with any special requirement(s) specified in the Act for the safe accommodation or care of the animal.

14.3. Licensees selling animals on the Schedule to the Dangerous Wild Animals Act should inspect the purchaser’s licence to keep an animal, and inform the issuing authority of the details of the purchase.

15. **PET CARE ADVICE**

15.1. Pet Care leaflets or other similar written instructions should be made available to customers free of charge at the time of purchase, in addition to any offer to purchase pet care books or leaflets.

15.2. Purchasers must be given proper advice on the care of the animal and, where necessary, on the maintenance and use of any accessories.

15.3. The PTIA Pet Store Manual or other appropriate reference books must always be available for use by staff.

16. **STAFF TRAINING AND LIVESTOCK KNOWLEDGE**

16.1. No animal should be stocked or sold unless the staff (or at least one member of the staff) is familiar with the care and welfare of the animals stocked and has a recognised qualification or suitable experience.

16.2. In respect of new applications (not renewals), at least one member of staff working at the licensed premises must hold the City and Guilds Pet Store Management Certificate, or some other appropriate qualification, or must be in the course of training and obtain the qualification within two years of the introduction of these conditions).

16.3. The licensee must formulate a written training policy for all permanent staff, and will be required to demonstrate that systematic training is carried out.

17. **FIRE AND OTHER EMERGENCY PRECAUTIONS**

17.1. Suitable emergency precautions and written procedures must exit and be made known to all staff, including arrangements for evacuation of livestock.

17.2. Entrances and exists must be clear of obstructions at all times.

17.3. Suitable fire fighting equipment must be provided maintained, regularly serviced and sited as advised by the local Fire Protection/Prevention Officer and in consultation with the local
authority. It is strongly recommended that smoke detectors and residual current devices or other similar devices are installed

17.4. The licensee, or a designated keyholder, must at all times be within reasonable distance of the premises and available to visit the premises in case of emergency.

17.5. A list of keyholders must be lodged with the local police and with the local authority.

17.6. In the interests of animal welfare, the following notice must be displayed at the front of the shop: ‘In case of an emergency, dial 999’. The number of the local police station should also be displayed.

17.7. When pet shops are sited within other premises, the licensee or keyholders must have access at all times to the premises containing the livestock.

17.8. All electrical installations and appliances must be maintained in a safe condition.

18. SALE OF DOGS

18.1. The keeper of a licensed pet shop is guilty of an offence if he sells a dog which, when delivered to him by a licensed dog breeder, was wearing a collar with an identifying tag or badge but is not wearing such a collar when delivered to the person to whom he sells it. (Breeding and Sale of Dogs (Welfare) Act 1999).
1. **SALES OF LIVESTOCK**

   1.1. No animal should be sold to any person under the age of 16 years who is unknown to the retailer unless that person is accompanied by a parent or legal guardian or provides appropriate written consent. Subsequent sales to a juvenile less than 16 years (but over 12 years) of age who is known to the retailer can be carried out in the absence of a parent or legal guardian or appropriate written consent, provided that the retailer is satisfied as far as possible that:

   (a) the parent/guardian would not object to the acquisition;
   (b) the juvenile is sufficiently knowledgeable as to the needs, care and nature of the species acquired; and
   (c) the juvenile’s intention towards the acquisition is consistent with the well being of the animal concerned.

2. **APPLICATION FOR A LICENCE**

   2.1. Although not provided for in the Act, it is recommended that applicants consult their local authority prior to submitting an application.

3. **TRADE ASSOCIATIONS**

   3.1. Licensees are recommended to apply for membership of an appropriate trade organisation. These can be a useful source of advice on all matters relating to the running of a pet shop and the care and treatment of individual animals.

4. **BOARDING OF ANIMALS**

   4.1. No pet shop should be used for the purpose of boarding any species of animal for which they are not licensed to sell. If it is intended to board cats and dogs, suitable and sufficient accommodation must be provided.

   4.2. NB Boarding of cats and dogs is subject to separate licence issued under the Animal Boarding Establishments Act.

5. **CATEGORIES OF ANIMALS WHICH A PET SHOP MAY BE LICENSED TO KEEP**

   (a) Dogs and cats (puppies and kittens);
   (b) Smaller domesticated mammals, e.g. rabbits, cavies, gerbils, hamsters, rats, mice;
   (c) Larger domesticated mammals, e.g. goats, pot bellied pigs;
   (d) Primates, e.g. marmosets;
   (e) Other mammals;
(f) Parrots, parakeets and macaws;
(g) Other birds;
(h) Reptiles;
(i) Amphibians;
(j) Fish;
(k) Other vertebrates.

SCHEDULE 1 STOCKING DENSITIES – CAGE BIRDS

1. ‘No species of bird shall be housed in accommodation which does not afford that species sufficient space for natural free and full wing stretching and the number of birds housed shall be such that overcrowding does not significantly reduce that freedom. Long tailed birds or birds in full plumage must be provided with properly placed perches and feeding and watering points to prevent that plumage being fouled or otherwise damaged.’

This refers to the Wildlife and Countryside Act 1981 which should not be contravened (especially Section 8 of the Act).

2. For perching birds, a sufficient number of perches (as appropriate) must be provided at such a height that the bird can rest its head without its head touching the top, and its tail the bottom of the cage.

3. A quality padded net should be used when catching birds in an aviary.

4. Minimum floor areas apply to young stock. For adult stock offered for sale, the dimensions should be doubled. For advice on the age of stock, it is advisable to contact the veterinary surgeon.

SCHEDULE 2 STOCKING DENSITIES – JUVENILE SMALL MAMMALS

</tr>
</tbody>
</table>

1. The range of behavioural opportunities for many of the animals listed in the above schedule will be increased by enriching the environment with accessories.
2. Raised shelving should be taken into consideration when assessing the total floor area.
3. Temporary (up to six days) rehousing of adult rabbits in smaller cages than specified above should be considered as acceptable.
The above recommended stocking densities are insufficient for the housing of marmosets. Marmosets must be housed in cages sufficiently large enough to allow for natural movement, such as climbing and swinging.

**SCHEDULE 3 STOCKING DENSITIES – ORNAMENTAL FISH**

1. It is virtually impossible to determine the quantity of fish to be kept in a tank purely on a weight/volume or numbers of fish/volume ration.
2. The variation in system design, husbandry techniques and types of fish involved would render any such method too simple to be useful or too complicated to be practical.
3. The maintenance of water quality standards is essential and is a simple but effective way to determine stocking densities. Water quality testing should be carried out at least once a week in centralised systems and 10% of individual tanks should likewise be tested. Unsatisfactory test results must be recorded in a register together with the corrective action taken. Further tests must be carried out when visual inspection of the tanks indicates the need.

**Water quality criteria**
(1 mg/litre – 1ppm)

</tbody>
</table>

* These parameters should be checked first. Only if a problem exists with these tests is it necessary to check nitrite and nitrate levels.

**SCHEDULE 4 STOCKING DENSITIES - OTHER SPECIES**

1. Other species should be housed in accommodation appropriate to size, age, and type of species; and to avoid overcrowding. There should be sufficient space for free and natural movement which should not be restricted by either the size of the accommodation or the number of animal in that holding. Correct temperature for the species must be maintained.
2. The advice and approval of the Licensing Authority should be sought wherever there is doubt about a species being sold.
